

PC6000

PC Based Radio Control Software

- Intuitive GUI
- Controls and Monitors Up to 49 Radios
- Runs on an IBM Compatible PC or Laptop
- Provides Same Menus as TMR6490
- Compatible (on Same Global Bus) with TMR6490 Control Unit Running CU6000 Application Software

PC6000—PC Based, Intuitive, Integrated, System-Wide Control and Management.

PC6000

PC Based Radio Control Software

PC6000 Control Software is a PC-based version of the TMR6940 Radio Control Unit adapted to run on a standard IBM compatible PC or laptop. PC6000 retains all control and monitoring functionality as found with the TMR6490 except for microphone and speaker audio functions. Connection to a single radio can be made using the RS-232 com port for distances up to 50 feet (15 meters) or to multiple radios with RS-485 connection for greater distances (PC requires an RS-485 port).

FEATURES

- User friendly GUI with same menus as the TMR6490
- Configuration Utility included to allow channel database uploads/downloads and easy radio configuration, setup, and file management using the RS-232 aux port on the radio
- Password protected log-on levels for Operator (database changes not allowed) and Engineer (administrator has full access to change database)
- Full control access to radios and ancillaries (PA, ATU and MCU) for configuration and status (BIT)

REQUIREMENTS

- Runs on Windows™ 98, NT4.0, 2000, or XP
- Pentium II or higher recommended

GENERAL

Communications Control Interfaces

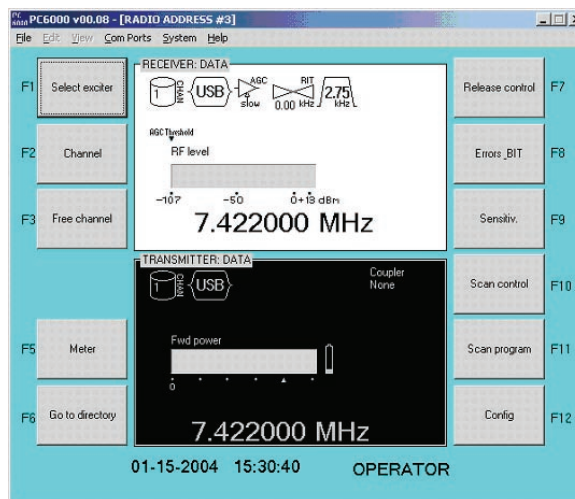

- RS-485 global bus communication control
- RS-232 maintenance control

Control Capability

- Any combination up to 49 radios and control units on the global bus network

Display Screen

- The display screen information consists of a control parameter display area and two menu selection areas on each side, which define the functions of the configurable soft keys
- Menus are organized such that no more than three levels of menus are required to access and modify the most frequently used parameters

- Non-U.S. Government sales are subject to U.S. Government approval.
- Specifications are subject to change without notice.
