

ARE YOU GETTING THE MOST OUT OF YOUR *SATCOM* COMMUNICATIONS?

The AN/PRC-148 JEM continues to provide more capability to warfighters.

The AN/PRC-148 JTRS Enhanced MBTR, or JEM, hosts all of today's key waveforms and enables the integration of program enhancements, future waveforms, and additional modes—all easily available via software upgrades. Your handheld radio can be used for a wider variety of applications with maximum flexibility and upgradeability. And, now, in addition to the other AN/PRC-148 JEM features, you can increase warfighter communications capability with the SATCOM IW waveform. SATCOM IW (MIL-STD-188-181C, -182B, -183B) doubles capacity for communications services over legacy DAMA, increases data throughput services, improves voice communications quality through inclusion of MELP voice encoding, and improves overall usability through a more intuitive human-machine interface. Get more capability. Get SATCOM IW.

Capability STARTS WITH THALES.
